BASIC EXAMPLES OF GOOD ACCESSIBILITY WEB DESIGN

1. Captioned videos

- ❖ Captioned videos on some video platforms aren't edited manually, often resulting in incorrect words caused by regional accents or bad audio.
- ❖ Audio descriptions of non-verbal actions help create an equal candidate experience

2. Navigable by keyboard

- ❖ Those with limited motor function cannot use a mouse
- ❖ You can replicate how screen reader software navigates your site by hitting 'tab' through each content element as part of applying for a job

3. Color contrast:

- ❖ Ratio of 4:5:1 for normal text
- ❖ Ratio of 3:1 for large text, graphics and user interface components

4. Avoid absolute font sizing

- Enables zoom software for the visually-impaired
-
